# DESIGN TECHNOLOGY

What is it like to learn Design Technology at Sheriff Hutton Primary School?

Design Technology is taught through both discrete lessons and a themed approach. Some learning is cross-curricular and linked to other subjects of the curriculum.

We practice our making skills using a range of tools.

Our designs are developed through sketches, diagrams and discussions with our peers.

We extend our technical knowledge through creating structures and products.

Starting our Moon Buggies in our 'Space' theme.

We enjoy using the Lego equipment to develop computer controlled products.

Designing and building a house in our Great Fire of London theme.

Trying out our balloon cars!

A fruit lolly

A Greek salad.

We gain an understanding of a healthy diet by making a variety of items.

We use a range of materials including fabric and recycled material to create our designs.

We visit the local farms to see how ingredients and grown and reared.

Fresh bread
